WORK EXPERIENCE

DevOps & Site Reliability Engineer
ICE Mortgage Technology | Bielsko/remote | Mar 2019 - now

- Building and supporting AWS infrastructure for running mortgage automation software, including configuration of cloud services and everyday maintenance.
- Introducing and enforcing infrastructure-as-a-code paradigms into everyday teamwork, using Terraform, Ansible, Jenkins Configuration as Code and other tools.

DevOps & Full Stack Developer
UWS Software Service | Gliwice/remote | Jun 2017 - Mar 2019

- Planned and successfully performed application migration from on-premise ESXi infrastructure to cloud Kubernetes service, with minimal downtime.
- Extended and enforced industry-standard DevOps practices, including full CI/CD, log aggregation, monitoring and metrics, using popular Open Source solutions.
- Developed backend of web application used to track employee work time. Single-handedly implemented integration with RFID attendance terminals around the country.

Mid Software Developer & DevOps Engineer
itSilesia | Gliwice/remote | Oct 2015 - Mar 2019

- Was responsible for provisioning, monitoring and maintenance of production servers using Jenkins/Gitlab-CI, Icinga and standard Linux tools. Helped teams with CI/CD pipelines and automation.
- Implemented and took part in onsite realization of distributed field game system, using RabbitMQ and custom services running on Raspberry Pi and Windows PC fleet.
- Developed custom CMS solution providing centralized media datastore to a set of mobile 3D apps, implemented as proprietary Wordpress plugin and backed by Grails webservice.
